

GCE Level 1

Practice Tasks

This Slide Deck provides Tasks for practicing G Suite for Education Apps in preparation for the Google Certified Educator Level 1 Exam.

****These tasks are not intended to teach the how-to.***

****These will not provide the full training needed to be successful with the exam.***

Visit the Google for Education Teacher Center for the full training and then use these Tasks that simulate the activities you will be asked to complete on the exam.

Before beginning the Tasks, you may want to create a GCE Level 1 folder in your Google Drive. When asked to “Make a Copy” for most of the tasks, copy to your GCE Level 1 folder for easier access later on.

Tasks

Depending on your level of proficiency, you may choose to complete some, all, or none of the tasks. These were created to compliment the information presented in the GSuite for Education Teacher Center for the Fundamentals Training.

The exam covers more than the application of the G Suite for Education apps, so it is not recommended to skip the information in the Teacher Center.

Google Docs

Skills Addressed:

- Page Setup
- Explore Tool
- Insert Picture
- Citing
- Tag and Assign Action Items
- Header/Footer
- Version History
- Sharing

Click the link below to get a “Force Copy” of the Google Doc Task. This will automatically save it to your Google Drive.
